

Voice-Based Concept Understanding Analyser

AI-Generated Educational Spoken Concept Assessment & Performance Report

Participant Name:	N/A	Assessment Date:	2026-07-13 16:05:04
Target Concept:	NLP	Audio Duration:	29.0 seconds

88.4/100	93.1/100	81.2/100
OVERALL SCORE	CONCEPT COHERENCE	SPEAKING FLUENCY

UNDERSTANDING LEVEL: STRONG UNDERSTANDING

Acoustic & NLP Evaluation Metrics

Metric Component	Analyzed Value	Benchmark Target	Diagnostic Status
Semantic Similarity	0.862	>= 0.700 (High Alignment)	Strong Coherence
Keyword Concept Coverage	100.0%	>= 70% of core terms	Satisfactory
Speaking Pace	95 Words / Min	110 - 150 WPM (Normal)	Slow
Pause & Hesitation Ratio	3.2%	10.0% - 25.0% (Natural)	Rushed Speech
Filler Word Ratio	0 words (0.0%)	<= 2.0% filler words	Low Fillers
Confidence (RMS Energy)	0.0583	0.020 - 0.250 (Variable)	Confident Volume

Speech Transcript vs. Concept Reference

Target Reference Explanation:	Spoken Transcript:
Natural Language Processing (NLP) is a branch of artificial intelligence and computer science that gives machines the ability to read, understand, and derive meaning from human languages. It bridges the gap between human communication and computer understanding through text analysis, speech recognition, and language generation.	Natural language processing is a branch of artificial intelligence and computer science that gives machines the ability to read understand and derive meaning from human languages. It bridges the gap between the human communication and computer understanding through the text analysis speech recognition and language generation.

Acoustic Waveform & Pause Segmentation

AI-Powered Speech Coaching & Feedback

Key Strengths:

- High semantic alignment with the reference concept, conveying the core concepts correctly.
- Excellent keyword coverage, incorporating major technical terms and vocabulary.
- Natural, conversational speaking pace (95 WPM).
- Highly clean speaking delivery with zero filler words.

Areas for Improvement:

- Very low pause ratio. Lack of silence indicates rushing through concepts.

Actionable Recommendations & Next Steps:

- Insert short 1-second silences between sentences or when shifting topics.
